

### ABOUT US

Helios Telecare is a Health IT company that provides Telehealth and Remote Patient Monitoring Platform as a Service (PaaS), Allowing Hospitals, Physician Practices, FQHC's, etc. to digitally extend care.

### OUR PLATFORM

One of the key benefits of Helios Telecare's services is the ability to provide real-time integrated data and analytics to healthcare providers, allowing for more informed decision-making and proactive care management.

Integrated remote patient monitoring technology enables patients to stay connected with their care teams and receive immediate medical support when needed.

### SERVICES

#### Turnkey Telehealth Platform

White label your practice with our comprehensive user-friendly, cloud based telemedicine platform that allows patients to schedule appointments, consult with healthcare professionals, provide diagnoses and treatments. Convenient access from smartphones, tablets, or computers via the Android or IOS app.

#### 4G or Bluetooth Remote Patient Monitoring (RPM). Acquire Temps, Glucose, Weight, Blood Pressure, Pulse and ECG

Our RPM solution is particularly useful for patients with chronic conditions who require extended care at home.

Applicable to patients with:

- Chronic conditions
  - High Blood Pressure
  - Diabetes
  - COPD
  - CHF

Applicable for

- Cardiologists,
- Internal Med Family Practice
- Nephrologists
- Transition care management teams
- Post operative care.

#### Clinical Interoperability

In today's digital age, clinical interoperability has become increasingly important as more healthcare providers adopt electronic health records (EHRs) and other digital health technologies. Without clinical interoperability, healthcare providers may struggle to access the complete and accurate health information they need to make informed treatment decisions and provide high-quality care.

### VALUE ADD

Monitor and connect with your patients using our digital platform to collect vital health data for analysis and health condition management

The value add of Remote Patient Monitoring can be understood from multiple perspectives:

- Enhanced Patient Care
- Improved Access and Convenience
- Cost-Effective Healthcare Delivery
- Patient Empowerment and Engagement
- Continuous Data Collection and Analysis
- Scalability and Flexibility

### BENEFITS

Simultaneously generate revenue, decrease hospital readmissions and emergency room visits. By identifying potential health issues early. Healthcare providers can intervene before they escalate.

### GENERATE REVENUE

While RPM primarily focuses on enhancing patient care and reducing healthcare costs, it can also generate revenue for healthcare providers and organizations.

Here are a few examples how:

1. Reimbursement and Billing:
2. Subscription-Based Services:
3. Expansion of Patient Base:
4. Partnerships and Collaborations:
5. Value-Added Services:
